

PEAK SERIES SEATING

The best seat
in the house.

Peak Series Seating

Premium, preferred seating. Exceptional quality.

All moving components in this seat require no oil, grease or ongoing maintenance. The seat is installed with lock washers and socket head screws for a lifetime of trouble-free operation. All metal parts finished with your choice in color of a durable UV powder-coated finish. The HDPE includes a flame-retardant additive. The contoured design of this seat increases strength while adding to the comfort.

Specifications

Standard Colors

RED - FR301

GREEN - FR603

BLUE - FR501

BLACK - FR001

Seat and Back Features

Seat and back shall be one-piece, injection-molded plastic construction, high density, high impact-resistant linear polyethylene with smooth surface. Seats and backs receive inserts which are securely fastened to the upholstered seat and back base. Stay-fast insert nuts to achieve torque and pullout strength requirements. The seat back is adjustable at initial installation to optimize both leg room and seat comfort.

Bracket Features

Seats and backs shall be supported by a powder-coated steel bracket. All riser center brackets to be installed with a minimum of three 8mm wedge anchors. Brackets to be installed on 500mm or 550mm centers; seats and backs are built to accommodate these sizes. Seat is tested by a certified, independent laboratory to 100,000 cycles with no appreciable loss to the self-rising action or loosening of components.

Model YH9312C

This model only comes with an upholstered, cushioned insert to the seat and back. With this increase in comfort, you are able to choose from a variety of finishes to further accent your facility. An added "C" to the model number indicates the inclusion of a cup holder.
