Apex Series Seating

Quality design for performance and durability.

Contemporary, auditorium seating featuring wooden seat, back and armrests affixed to a steel frame. All moving components in this seat require no oil, grease or ongoing maintenance. The seat is installed with lock washers and socket head screws for a lifetime of trouble-free operation. All metal parts finished with your choice in color of a anti-rust, electrostatic polyester painted finish. The ergonomic design of this seat increases strength while adding to the comfort.

Specifications

Standard Colors

RED - FR301

GREEN - FR603

BLUE - FR501

BLACK - FR001

Seat, Back and Tablet Features

Seat, back and table are constructed of plywood coated with melamine. Curved-edge armrests are made of solid beech with a durable polyester paint finish. Stay-fast insert nuts to achieve torque and pullout strength requirements. The seat back is adjustable at initial installation to optimize both leg room and seat comfort.

Bracket Features

Seats, backs and armrest shall be supported by anti-rust, electrostatic polyester painted steel frame and brackets. All riser center brackets to be installed with a minimum of three 8mm wedge anchors. Brackets to be installed on 500mm or 550mm centers; seats and backs are built to accommodate these sizes. Seat is tested by a certified, independent laboratory to 100,000 cycles with no appreciable loss to the self-rising action or loosening of components.

Model YM-RT

This model comes with an upholstered, cushioned insert to the seat and back. With this increase in comfort, you are able to choose from a variety of finishes to further accent your facility. An added option of a flip tablet also available.

Options

- Unique color matching
- Seat padding
