

# **DASHER BOARD SYSTEMS**

for Indoor Soccer Pitches,  
Lacrosse Fields,  
and Multi-Activity Courts (MACs)

# CAS3900 Series Soccer Dasher Boards

## A clear difference for a better view.

For Soccer & Multi-Activity Courts (MAC), we sell and service items that any arena or training facility with an active field would need. Our CAS3900 series products are some of the industries most well-respected Design-Built Soccer Dasher-boards. Our systems for indoor facilities are “state-of-the-art”, technologically advanced products specifically designed and purpose-built.

The CAS3900 system shows off a sleek, modern appearance, providing excellent spectator views. The frameless, tempered glass areas provide surprising flex and good energy absorption upon player impact.

### System includes:

- Full view tempered glass walls
- Powder-coated framework
- HDPE sill, goals and gates
- Curved, tempered glass corners
- Sliding goal infill panels
- Barrier netting
- Players’ boxes
- White 1-1/8” melamine panels

# CAS8800 Series Portable Soccer Dasher Boards

## The choice of going portable.

For Soccer & Multi Activity-Courts (MAC), we sell and service items that any arena or training facility with an active field would need. Our CAS8800 series products are some of the industries most well-respected Design-Built Soccer Dashboards.

Our systems for indoor facilities are “state-of-the-art”, technologically advanced products specifically designed and purpose-built.

### System includes:

- Portable or permanent installs
- Hot-dipped galvanized framework
- Access gates built into goals
- Extra heavy-duty barrier netting
- Lightweight, durable, responsive playing surface
- Many size options, including 20M x 30M
- Suitable for multi-sport use
- White 1 1/8” melamine panels

# INFINITY Series™

## Designed and built for the world of indoor.

The INFINITY Series™ containment board system is designed specifically for indoor soccer pitches, lacrosse fields and Multi-Activity Courts (MACs).

Our dasher board systems are crafted from tubular extrusions of T-5 tempered aluminum alloy, engineered and designed by us specifically for our dasher board systems. These extrusions are proprietary to Athletica Sport Systems; nothing 'off-the-shelf' about it. The aluminum frame construction gives you the strength and durability you need for permanent installations, yet its light weight makes it ideal for ease of handling where changeovers are required.

Through prototype testing with some of the game's most respected consultants, to final product construction, we're confident there's nothing better suited to indoor sport.

With an anodized aluminum finish, it provides a clean, high-tech look that will never rust or pit so your boards will always look great. Panels are shipped from our factory pre-glazed and pre-assembled. Installation time is minimal, meaning your playing field is up and running sooner.

Using state-of-the-art concealed mechanical fastening techniques, INFINITY Series™ provides a better and stronger board system than old fashioned welded aluminum or steel boards. No exposed brackets or anchors, no collection areas for debris or dirt. All exposed hardware (e.g. hinges or gate latches) are made of stainless steel for maintenance-free durability.

All INFINITY Series™ playing surfaces are completely smooth, featuring strong and durable tempered glass and long lasting High Density Polyethylene (HDPE), and can be customized in an infinite variety of glass-to-board ratios (from all glass to all plastic), allowing you to pick the places in your facility to maximize the view for the spectators and your revenue via sponsorship (stick-on) ad panels.

# Seamless INFINITY Series™

Door closure mechanism is easily accessed from either side, yet never gets in the way of play.

Laser cut stainless steel hardware never rusts, and never needs grease - endless durability.

Optional retractable goal is customized to your facility. Available for turf and court sports.

Easy to retract, virtually seamless when closed.

Customize your INFINITY Series™ board system in an infinite variety of glass-to-board ratios. Full height glass allows you to keep bleacher heights to a minimum for spectator safety and comfort, while maximizing the view for the 'wow factor'.

## The advantages are clear.

### Player Safety

Built for player safety, the INFINITY Series™ & Seamless INFINITY Series™ frames flex upon player impact, keeping the players safer than board systems without flex. These are the only multi-sport systems around designed by a professional engineer and successfully load-rating tested by an independent testing lab.

### Safe, Strong, Long-lasting

A short frame constructed from strong anodized aluminum extrusions. Frames can be customized in height between 32 and 42 inches, and feature a colored caprail (custom colors are available). Great looks in an inconspicuous design! Frames are mechanically fastened for superior strength and flexibility as compared to improperly welded aluminum, or welded steel systems. Safe, strong and long lasting. Tempered safety glass can be as high as 96" and is secured to the frames with a retaining clip along the bottom of the frame, and ultra-high strength tape (engineer tested and approved for this application) all around the frame.

### Get the Seamless INFINITY Series™ advantage

- No tall vertical posts obstructing the sight lines
- No chipped or peeling paint in need of constant touch up
- No unsightly galvanized steel frames
- No nasty rust to deter from the great look and image of your facility
- No heavy looking railing over top edge of the glass

# EVOLUTION Series

## The fully evolved dasher system for Indoor Turf Sports.

With our 100% frameless design, that has no upright supports (except at gate locations), the Evolution dasher system shows off a sleek, modern appearance, providing spectator viewing that is superior to any other soccer board system on the market. The frameless, tempered glass provides surprising flex, and good energy absorption upon player impact.

Featuring an easy-to-install L-Channel made of super-strong anodized aluminum that mounts onto threaded rods set in epoxy anchors (holes drilled on-site), the Evolution system is the most user-friendly dasher system when it comes to installation. Just install the L-Channel, and pop in the glass, which sits snugly and safely in a white EPDM Gasket.

And, unlike some of the other systems out there, Athletica Sport Systems tempered glass always meets ANSI specs, and always carries the ANSI seal of approval.

With the EVOLUTION dasher system, you're getting the best value of any soccer board system available today.

**The 100% seamless EVOLUTION glass wall system surrounding our turf fields looks fantastic, plays professionally and gives our viewers a crystal clear, unobstructed view of the action. We are extremely satisfied.**

# Synthetic Grass Systems

## EasyField Portable Sports Panels

Made of high quality synthetic turf, EasyField has been tested under rigorous conditions and is designed to outlast any portable system under the harshest use. EasyField feels great underfoot and looks tremendous in any setting.

EasyField by FieldTurf® was designed with your facility in mind. It's a quick, convenient, portable, high performing indoor turf system. EasyField provides indoor facility owners with the ultimate in versatility – a durable, impact-absorbing turf system. FieldTurf engineered the easiest, fastest and most secure way of locking your portable field panels together.

The turf area of each panel has a dimension of 5.17 ft x 3.44 ft. At just 21 pounds, each panel is extremely light weight for easy carrying, maneuvering and installation. Installing a good sports field has never been this easy. Our do-it-yourself system is so simple, a small crew of people can install a full size field (17,000 sq ft) in less than a day. No special equipment. No heavy lifting.

A Tarkett Sports Company

## GrassTex Arena Pro & V-Max

This non-rubber infilled turf has all the advantages of previous generations and perform even higher in wear and resistance tests. The blend of nylon and polyethylene is an almost perfect 50/50 combination. This gives you the true ball roll of a traditional nylon field, with the softness of the new generation rubber-filled turf. No rubber infill makes maintenance easier, and up to 10% cooler. These systems can also be portable with added 4" or 8" Velcro. Various turf colors available.

## Turf Claw Foam Back Turf Adhesive

Turf Claw FB is a high solids adhesive developed to withstand outdoor environments, as well as demanding indoor applications. Made with an advanced antimicrobial system to protect the adhesive from bacteria and fungal growth, Turf Claw FB is solvent-free, low odor and designed for the permanent installation of rubber backed and urethane backed artificial grass carpet, outdoor unitary latex and marine back carpets, carpet with synthetic secondary backings, cork underlayment and flooring. Turf Claw FB is also recommended for indoor installations of most commercial carpets except for those with vinyl backings. Turf Claw FB is CRI™ Green Label Plus approved for indoor air quality.

# Containment Netting

## Nylon Containment Net

The industry standard for containment netting in hockey rinks. 1.5" mesh x 2 mm twine with rope or tape binding edge finish with grommets. Ask about our fire retardant option.

## Monofilament Containment Netting

When hung properly, monofilament netting is almost invisible. A metal conduit frame will provide the best results for attaching the net at the ceiling. 3.25" stretch mesh x 1.1 mm twine, diamond pattern with rope binding edge finish only. Order in full foot increments.

## Kevlar® Containment Net

Enjoy superior spectator viewing with a Kevlar® small twine knotted safety net. 3" stretch mesh x 1.2 mm twine with rope binding edge finish. Fire retardant. Custom made to your exact length and height requirements. For indoor use only.

# Goals / Goal Nets

## Round-Frame Aluminum Goals

The portable round-frame aluminum soccer goal completes your goal box for regulation play on the soccer pitch. The white powder-coated 6' x 12' goal with 4" round frame provides strength and stability, while the continuous net attachment channels along the ground bar prevent ball breakout.

Top-of-the-line goal is designed for competitive play and withstands rigorous games.

4" x 2" full ground bar with net clip channel provides ultimate stability and prevents balls from sneaking in on the side or rolling through the back of the goal.

Extruded aluminum frame is lightweight for ease of assembly and transport. Welded one-piece goal frame corners provide strength and rigidity with no visible hardware. Crossbar, uprights, side bars, and ground bar all contain a channel for easy and secure net clip insertion, as well as keeping the net securely fastened to prevent balls from sneaking through the net. Crossbar, uprights, side bars, and ground bar are powder-coated white for durability and protection against weather elements. Goals sold in pairs; nets are included. Permanent, semi-permanent and custom size goals available.

### Soccer Nets

Soccer nets constructed of high-tenacity polypropylene to provide maximum strength during relentless play. Knotless netting ensures safety and ease of set up. All nets include net clip attachments for safely securing net to goal. Most sizes available in your choice of white or orange. All nets feature blue location tags to help with proper installation. Meets NCAA, NHSAA, and FIFA specifications. *Sold in pairs.*

# Seating

*Players' Bench Seating*

*Retractable Bleacher Seating*

## Retractable Bleacher Seating

Options include:

- Unique color-matching
- Bench back rest
- Wood bench seating
- Back rest
- Contrast colors for inlays

## 3C Series Tip & Roll Bleacher

Options include:

- Custom colors
- Double or single foot planks
- 2, 3, and 4 row configuration
- Chain-link handrail
- Variety of lengths

*Tip & Roll Bleacher Seating*

## Double Plank Benches - with and without backs

# Flooring / Scoreboards

## CAS ISO-Cushion Floating Gym Floor

ISO-Cushion is our most popular bio-mechanically designed floating wood floor system. We have taken into consideration the performance requirements of athletes all age and size. We are able to fine tune the shock absorption as required.

As a result of combining a thicker maple surface, dual layer sub-floor, and resilient ISO-cushion pads, this floor can be perfectly fine tuned for the performance levels targeted for particular activities.

Excellent non-athletic load bearing capabilities with a continuous sub-floor that adds strength and load stability throughout the floor.

### SYSTEM FEATURES

- Northern Hard Maple
- Variety of pad options
- Continuous solid sub-floor
- Floating system to allow for expansion

### PAD FEATURES

- 2-stage resilience for light and heavy loads
- DIN tested shock absorption
- 45 and 55 durometer options

## Eversan Scoreboards

Eversan, Inc. combines advanced technology with innovation, creating durable high-quality products designed to exceed the high standards of athletic programs. Their current line of products are continually updated to incorporate state-of-the-art advanced technology, quality, and user-friendly operations.
